

## 1,000 Litre IBC (Returnable Container)

<b>Length:</b>	1200 mm
<b>Width:</b>	1000 mm
<b>Height:</b>	1160 mm
<b>Weight:</b>	1200 kg

### IBC Overview

Plastic Intermediate Bulk Containers are moulded from a premium grade of Urea resistant, Medium Density Polyethylene.

- 1,000 Litre IBCs offer flexible solution for any business with a fleet of vehicles
- IBCs are standard pallet size which makes it easy to manage large volumes of Eco-DEF
- IBCs are a cost effective way to purchase Eco-DEF, generally cheaper to buy than 200 Litre drums
- IBCs are returnable which reduces the cost of your Eco-DEF

### Spectrum Fluid Technologies

#### What is Eco-DEF?

Spectrum Fluid Technologies manufactures and distributes Eco-DEF (Diesel Exhaust Fluid).

Eco-DEF is used in a process called Selective Catalytic Reduction (SCR) to reduce exhaust emission levels of nitrous oxide (NOx) in diesel engines.

The Eco-DEF which is manufactured by our Australian owned company meets or exceeds ISO 22241 international standard.

The standard outlined in ISO 22241 requires Eco-DEF to contain 32.5% solution of high-purity urea in demineralised water which is AUS32 (Aqueous Urea Solution 32.5%).

#### Who can use Eco-DEF?

Eco-DEF can be used by any truck or bus company that runs SCR engines to comply with Euro 4, 5 and 6 standards.

Whether you have a fleet of 1 or 100, we can offer a range of solutions including delivery of Intermediate Bulk Containers (IBCs) or bulk liquid to be stored in Bulk Dispensing Tanks.
